

BOISE STATE UNIVERSITY

RESEARCH
STRENGTHS

PUBLIC POLICY

GOVERNMENT • HEALTH • ENERGY

Economic development, access to health care, strong civic leadership, a clean environment and affordable energy affect the quality of life for all Idahoans. Boise State oversees a broad array of research programs that provide policymakers, citizens and agencies with the information and skills they need to advance and protect the interests of our citizens.

- Wide-ranging research programs address issues of local, state and national concern, from immigration reform and Medicaid expansion to national parks management, regional transportation issues, redistricting tradeoffs, adult perceptions of underage drinking, energy infrastructure, wildfires at the wildland-urban interface and the future of nuclear power
- Accomplished faculty researchers have published hundreds of studies and reports in top academic journals, authored dozens of books and made presentations at major conferences around the globe
- Research collaborations with many public and private sector partners result in indepth analyses that inform decision-making on a broad range of topics
- Ph.D. program in Public Policy and Administration includes a strong research component; master's and undergraduate students in a range of disciplines work with faculty on policy-related research
- Programs such as the annual Frank Church Institute Conference, the Western Energy Policy Research Conference, the Fettuccine Forum and seminars of the Andrus Center for Public Policy engage the public and diverse stakeholders on policy issues and encourage thoughtful dialogue

POLICY

Informed and insightful decision-making begins with identifying and understanding the issues, challenges and outcomes associated with any course of action. Boise State faculty in a range of disciplines are involved in broad-based policy research that is providing analyses and expertise critical to this important process.
